General Information on the Mission

Première Urgence Internationale (PUI) is a non-governmental, non-profit, non-political and non-religious international aid organization. PUI teams are committed to supporting civilians’ victims of marginalization and exclusion, or hit by natural disasters, wars and economic collapses, by answering their fundamental needs. PUI’s aim is to provide emergency relief to uprooted people in order to help them recover their dignity and regain self-sufficiency. The association leads in average 200 projects by year in the following sectors of intervention: food security, health, nutrition, construction and rehabilitation of infrastructures, water, sanitation, hygiene and economic recovery. PUI is providing assistance to around 7 million people in 21 countries – in Africa, Asia, Middle East, Eastern Europe and France.

Humanitarian Context in Iraq

Wide-scale violence and armed conflict erupted in Iraq in January 2014. In Anbar governorate, the cities of Ramadi and Falluja were particularly affected, the violence and its impact quickly grew. Also in June 2014, ISg, together with other armed groups, attacked and seized control of Mosul and large portions of northern Iraq, including areas of Diyala, Kirkuk, Ninewa, and Salah al-Din governorates. The Government of Iraq (GoI) has conducted multiple military operations since 2016 to regain control of territories held by ISg and announced in November 2017 that military operations had successfully concluded in their retaking of all Iraqi territory. Military operations in Mosul, Anbar and Salah Al-Din have led to ongoing massive internal displacements, serious and systematic violations of civilian protection and basic human rights, interrupted access to basic services, and put a severe strain on host communities. The country is now gradually moving from an emergency situation which required lifesaving operations to a post-conflict transition towards durable solutions. As per the HNO published by OCHA on November 2019, 5.67 million people are in need of humanitarian assistance, with 1.77 million in acute need. Half of them are concentrated in Ninewa and Anbar governorates. Furthermore, an estimated 2.8 million returnees continue to form a complex caseload for humanitarians, development actors, relevant government agencies and donors, with 1.2 million in acute resilience and recovery needs.

PUI in Iraq

Implemented in Iraq since 1983 through Aide Médicale Internationale (AMI), and since 1997 through Première Urgence (PU), PUI (Première Urgence Internationale) brings help to vulnerable refugees, displaced persons as well as host communities (to avoid marginalization when the pressure on available resources becomes unbearable), in order to improve their living conditions and reinforce their resilience to enable them to regain dignity and autonomy. PUI’s objective in Iraq is to provide a humanitarian response to needs arising from movements of population through actions aimed at reinforcing the existing Health system, and providing Mental Health Psychosocial Support to the people in need, but also at providing access to Shelter, to drinking Water, Hygiene and Sanitation. Given the scale of the crisis and the needs observed, PUI emphasizes multiple sectoral interventions and develops as much as possible an integrated approach, keeping health the core sector of its intervention.
Current programs of PUI in Iraq

1. Integrated Health, Protection, WASH and Shelter services provision to IDPs and vulnerable communities living in areas previously affected by the conflict in Anbar, Ninewa and Dohuk Governorates of Iraq
   The project aims at improving the living conditions of vulnerable populations in areas still impacted by the previous conflict, through health, protection, shelter and WASH interventions, and at providing health and protection services to IDPs in camps.

2. Strengthening quality and access to mental health services in Iraq, in consortium with ACF-lead, IMC and HI
   The project aims at improving the access to quality mental health and psychosocial care in Iraq through enhancing technical capacities of governmental institutions at the ministry of health level, capacity building of stakeholders at national and governorates levels and promotion of mental health care. In particular, the project supports the mental health authorities in Iraq in order to improve the access and quality of services as well as increase community resilience.

3. Emergency Response to the North East Syria refugees through the provision of Primary Healthcare services in Bardarash refugee camp, Kurdistan Region of Iraq
   The project aims at ensuring the access to quality primary health care services to the Syrian refugees affected by the emergency in North-East of Syria (started on October 2019, and still ongoing as per the end of November). The assistance includes the revitalization of a PHCC, awareness campaigns on good health and hygiene practices, referrals to secondary health care, in addition to mental health and psychosocial support, and sexual and reproductive health services.
